No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            score:

FEATURE: NAME/KEY: CDS ORGANISM: Homo sapiens TYPE: DNA

SEQ ID NO 3 LENGTH: 654

SUFTWARE: PatentIn Ver. 2.1

APPLICANT: PROCTER, ANNIE M.
APPLICANT: GREGORY, JOHN APPLICANT: COOPER, DAVID N.

Sequence 3, Application US/10788318
Publication No. US20040137510A1
GENERAL INFORMATION:

APPLICANT: MILLAR, DAVID S.
TITLE OF INVENTION: HEPODE FOR DETECTING GROWTH HORMONE VARIATIONS
TITLE OF INVENTION: HUMANS, THE VARIATIONS AND THEIR USES

H
